Incomplete Pattern — Achievers / HOTS

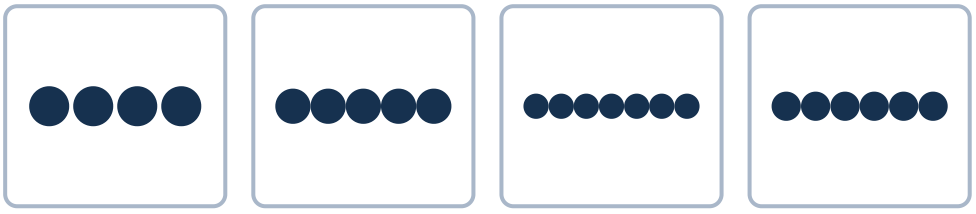

A harder follow-on to `23-incomplete-pattern/`: the rule now depends on BOTH the row and the column (not just left to right), including true Latin-square grids where every row and column contains each kind of figure exactly once, and a few questions where the missing cell isn't in the bottom-right corner. 15 questions, 4-option MCQ, untimed.

Q1.

Dot count — row + column

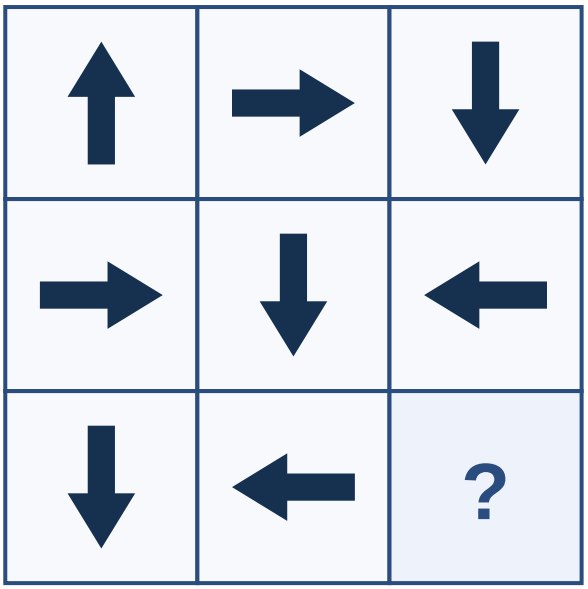

This pattern changes along BOTH rows and columns — not just left to right. Work out the rule, then find what replaces the '?'.

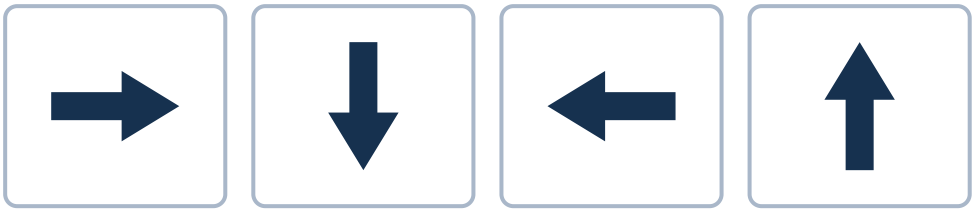

Q2.

Arrow rotation — row + column

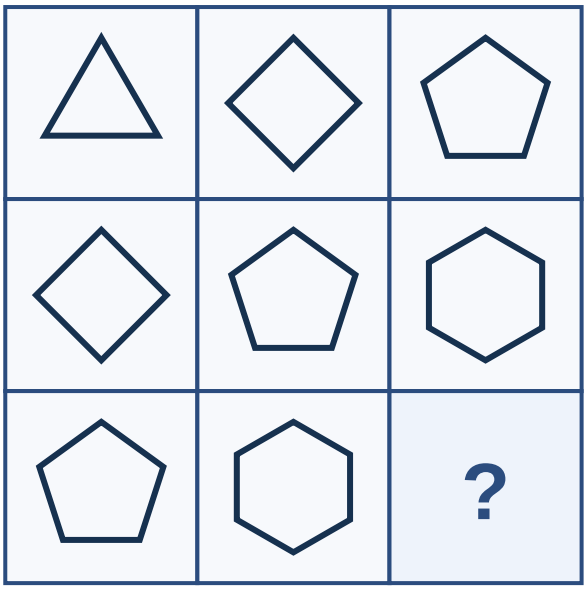

This pattern changes along BOTH rows and columns — not just left to right. Work out the rule, then find what replaces the '?'.

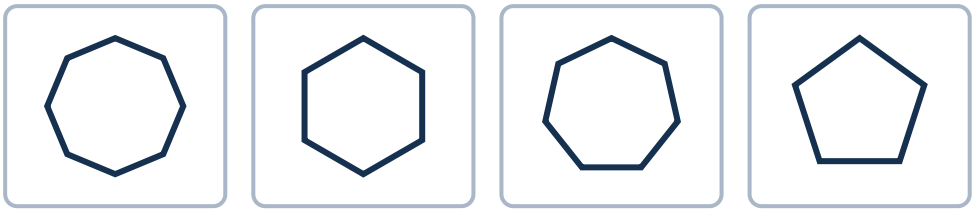

A **B** **C** **D**

Q3.

Number-of-sides — row + column

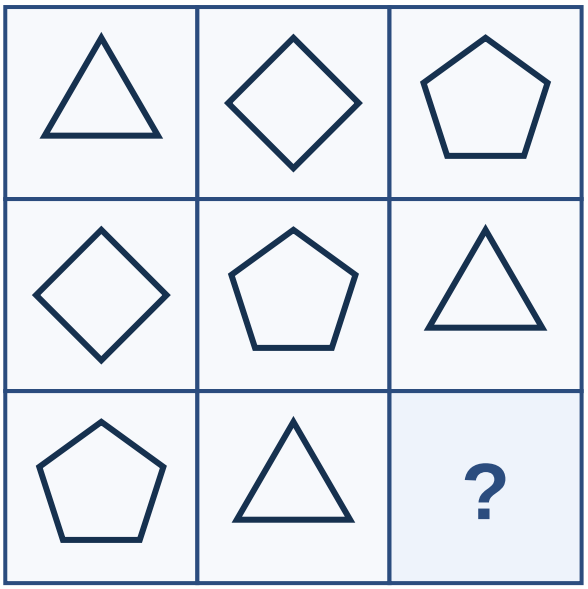

This pattern changes along BOTH rows and columns — not just left to right. Work out the rule, then find what replaces the '?'.

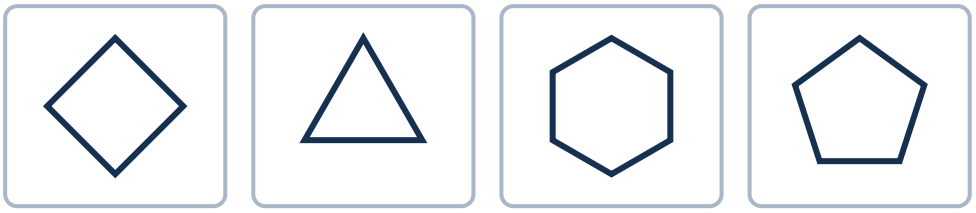

A **B** **C** **D**

Q4.

Shape Latin square

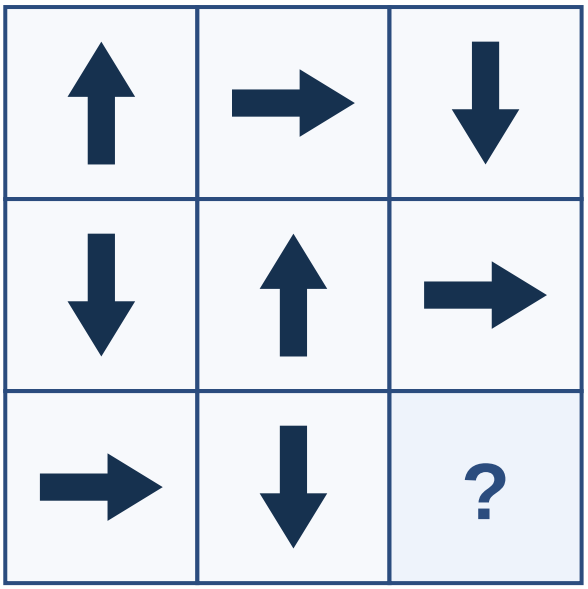

Every ROW and every COLUMN has each kind of figure exactly once.
Which option (A–D) replaces the '?' to complete it?

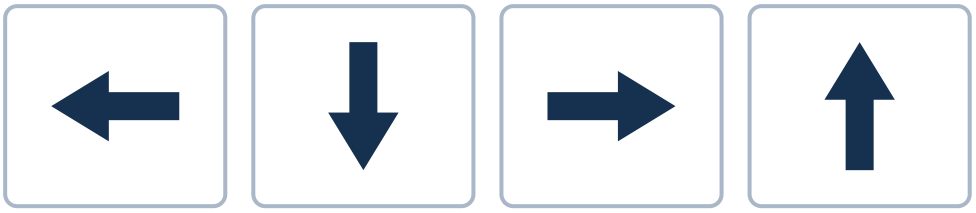

A **B** **C** **D**

Q5.

Rotation Latin square

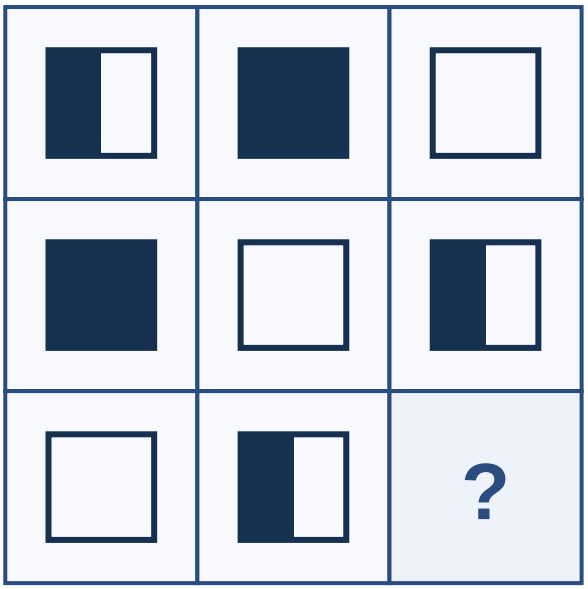

Every ROW and every COLUMN has each kind of figure exactly once.
Which option (A–D) replaces the '?' to complete it?

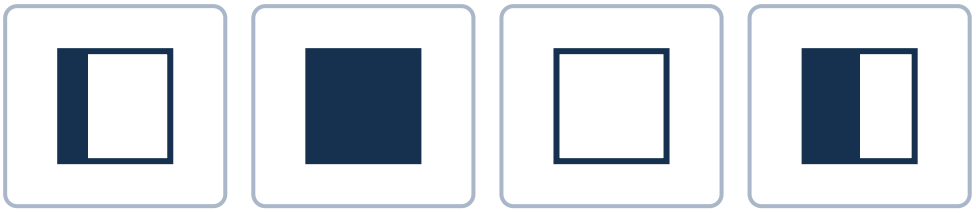

A **B** **C** **D**

Q6.

Shading Latin square

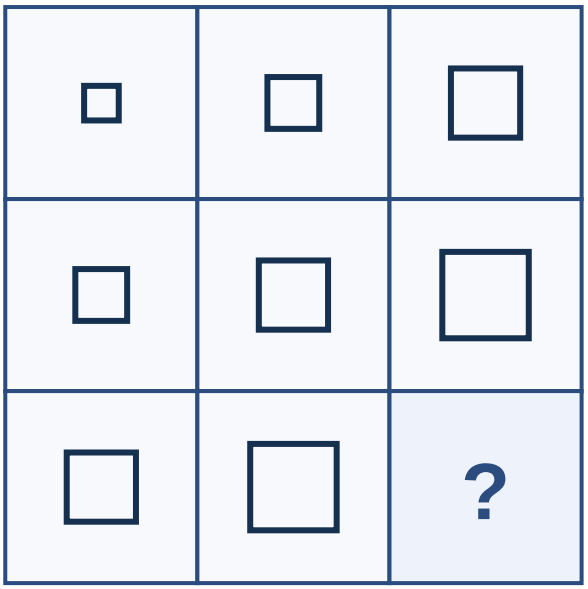

Every ROW and every COLUMN has each kind of figure exactly once. Which option (A–D) replaces the '?' to complete it?

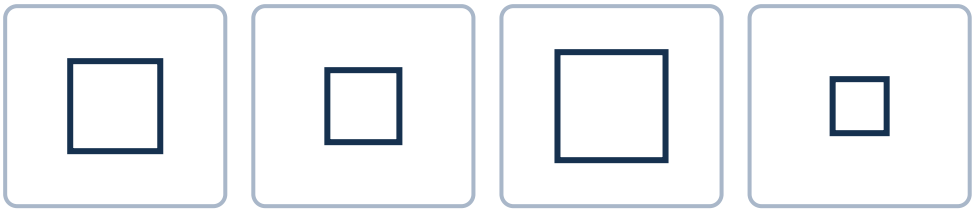

A **B** **C** **D**

Q7.

Growing square — row + column

This pattern changes along BOTH rows and columns — not just left to right. Work out the rule, then find what replaces the '?'.

A **B** **C** **D**

Q8.

Line count — row + column

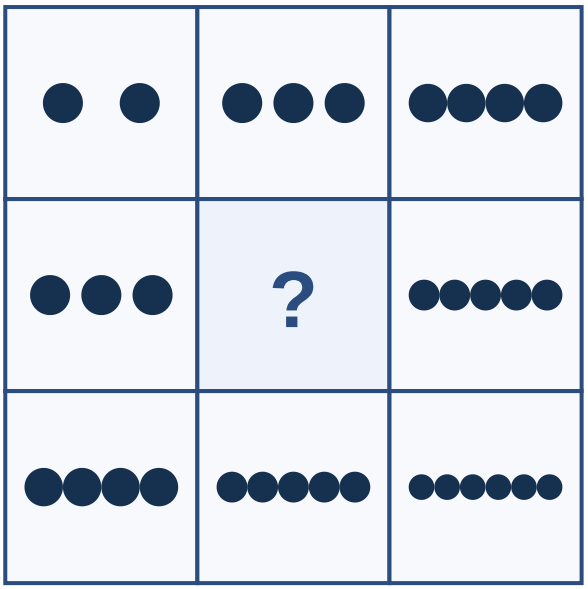

This pattern changes along BOTH rows and columns — not just left to right. Work out the rule, then find what replaces the '?'.

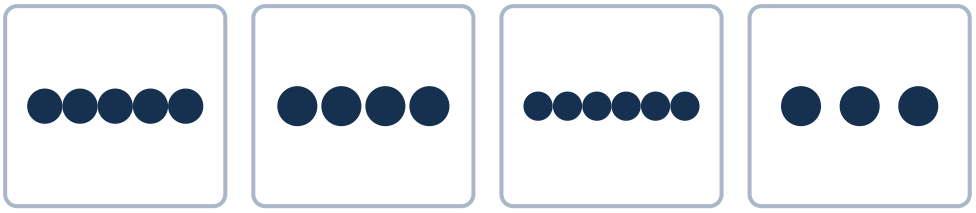

A **B** **C** **D**

Q9.

Dot count — missing cell in the middle!

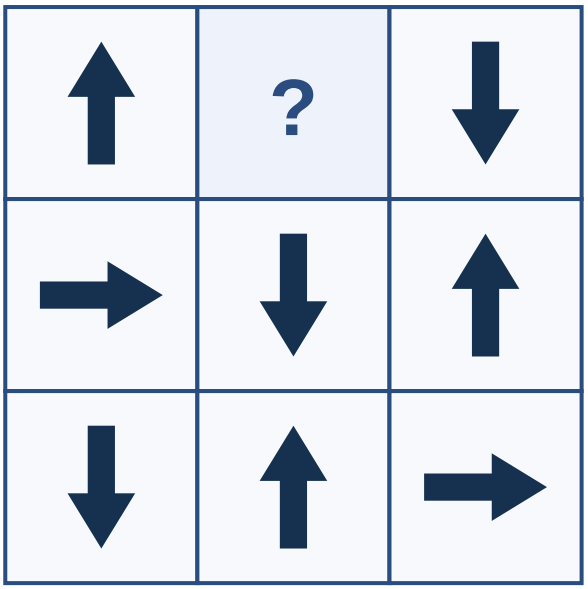

This pattern changes along BOTH rows and columns — not just left to right. Work out the rule, then find what replaces the '?'.

Q10.

Rotation Latin square — missing cell at the top

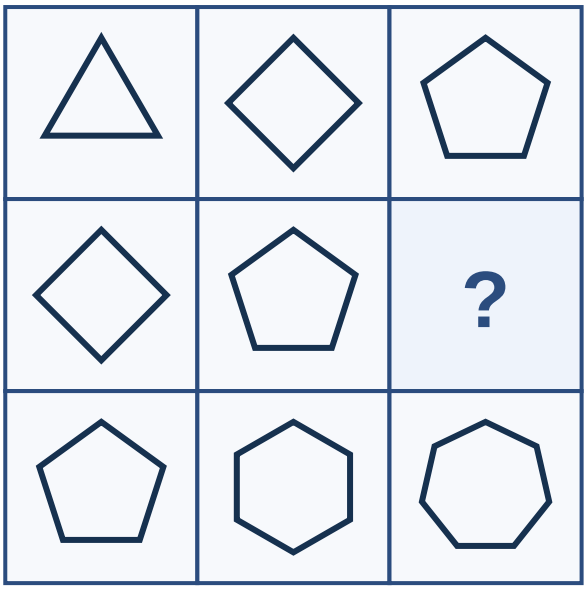

Every ROW and every COLUMN has each kind of figure exactly once.
Which option (A–D) replaces the '?' to complete it?

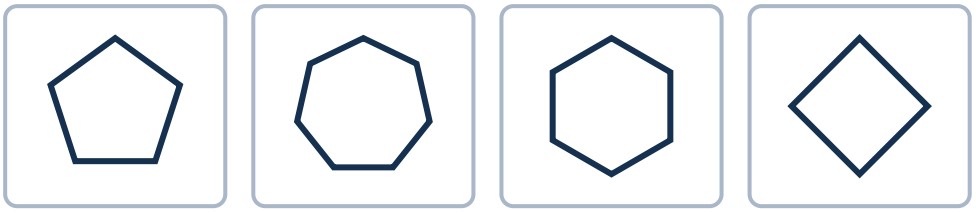

A **B** **C** **D**

Q11.

Number-of-sides — missing cell on the right

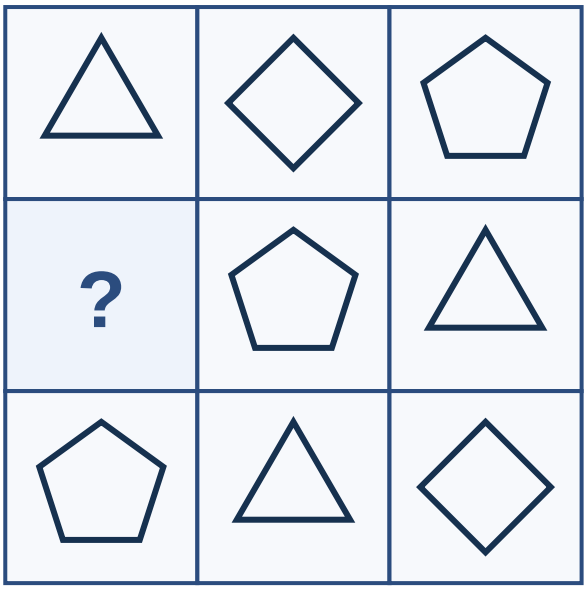

This pattern changes along BOTH rows and columns — not just left to right. Work out the rule, then find what replaces the '?'.

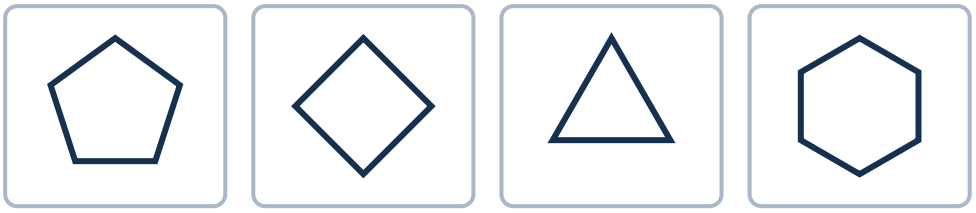

A **B** **C** **D**

Q12.

Shape Latin square — missing cell on the left

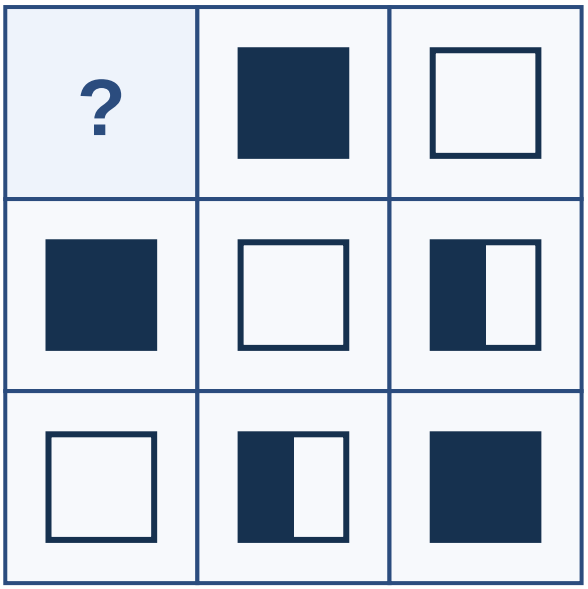

Every ROW and every COLUMN has each kind of figure exactly once. Which option (A–D) replaces the '?' to complete it?

A **B** **C** **D**

Q13.

Shading Latin square — missing cell at the top

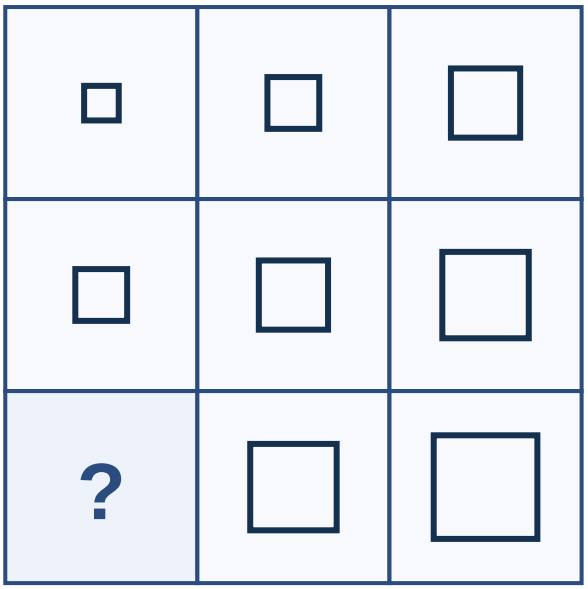

Every ROW and every COLUMN has each kind of figure exactly once. Which option (A–D) replaces the '?' to complete it?

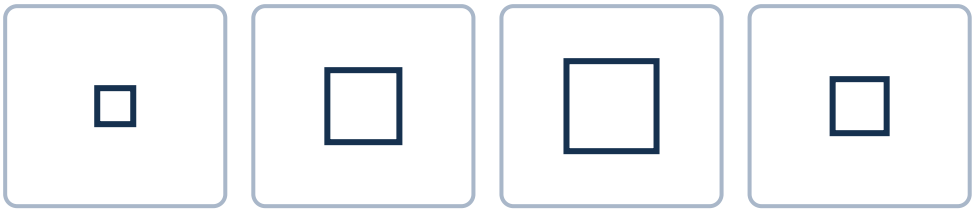

A **B** **C** **D**

Q14.

Growing square — missing cell on the left

This pattern changes along BOTH rows and columns — not just left to right. Work out the rule, then find what replaces the '?'.

A **B** **C** **D**

Q15.

Line count — missing cell on the right

This pattern changes along BOTH rows and columns — not just left to right. Work out the rule, then find what replaces the '?'.
