Exam Pattern — Class 4 Mathematics Olympiad

1. SOF IMO — Level 1 (the exam everyone takes)

Section	# Questions	Marks each	Total marks
1. Logical Reasoning	10	1	10
2. Mathematical Reasoning	10	1	10
3. Everyday Mathematics	10	1	10
4. Achievers Section (HOTS)	5	2	10
Total	**35**	—	**40**

- **Duration:** 60 minutes.
- **Question type:** Objective, 4-option MCQ.
- **Negative marking:** None.
- **Difficulty shape:** Sections 1–3 are mostly single-step/direct; the Achievers section is deliberately 2–3 step (HOTS) and worth double marks — it's the section that separates Level-2 qualifiers.

2. SOF IMO — Level 2 (for qualifiers only)

- Same 4-section structure and 60-minute duration, but materially harder — more multi-step Achievers-style reasoning throughout, including in Sections 2 and 3.
- **Who qualifies for Level 2** (any one of these, class-wise/zone-wise):
  - Top 5% of students in that class, zone-wise, in Level 1.
  - Top 25 rank holders, zone-wise and class-wise.
  - The class topper, if ≥10 students from that class appeared and the topper scored ≥50%.
- **2025–26 Level-2 cutoff for Class 4:** 30/40 total, with section minimums around Achievers 8, Mathematical Reasoning 6, Everyday Mathematics 9, Logical Reasoning 7 (cutoffs are revised each year — treat as a target, not a guarantee).
- **Tie-break order** when totals are equal: Achievers → Mathematical Reasoning → Everyday Mathematics → Logical Reasoning. This is *why* the practice plan gives the Achievers section disproportionate attention — it's the highest-leverage section twice over (double marks, and first tie-breaker).

3. Silverzone iOM — Class 4

Unit	# Questions	Marks each	Total
Numbers and Their Operations	9	2	18
Parts and Wholes (fractions/decimals)	4	2	8
Money, Time and Calendar	2	2	4
Geometry	3	2	6
Area and Its Boundary (perimeter/area)	4	2	8
Graphical Representation of Data	2	2	4
Maths total	**24**		**48**

Plus a **Reasoning and Aptitude** section and a **Scholar's Zone** (HOTS) section bring the paper to 30 questions overall. No negative marking. English only.

4. Unified Council UIMO — Classes 3–5

Section	Marks
Mathematics	35
Logical Reasoning	10
Critical Thinking (HOTS)	5
Total (50 questions)	**50**

Objective MCQs, no negative marking.

5. What this means for practice

All three exams are strictly timed, all-MCQ, zero-negative-marking papers with the same four ingredients in different proportions: **pure arithmetic → applied word problems → reasoning puzzles → multi-step HOTS**. So the practice plan (`03-practice-plan.md`) and every sample paper here is built to the **SOF IMO shape** (35 Q / 40 marks / 60 min, 4 sections) since it's the strictest superset — anyone comfortable with IMO Level 1 is comfortable with iOM and UIMO's papers too.
