Subtracting Figures

A dedicated worksheet for the **Figure Subtraction** reasoning puzzle type (Figure (1) minus Figure (2) = Figure (3)) — identified as a gap against the school's own syllabus. Each figure is built from simple parts (outlines, diagonals, flaps, a circle...); subtracting Figure (2) means removing exactly those parts from Figure (1), leaving the rest as Figure (3). 15 questions, 4-option MCQ, untimed.

Q1.

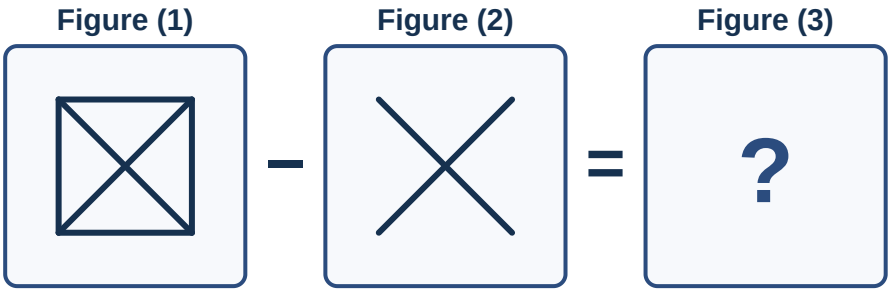

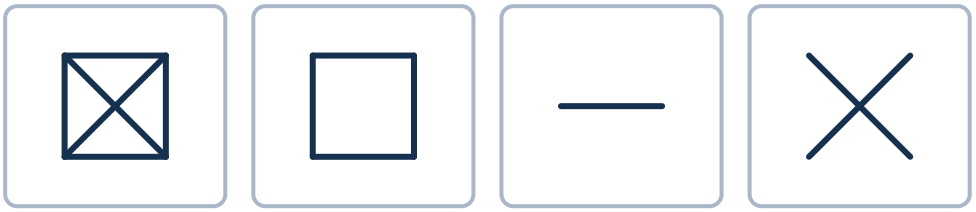

Figure (2) is subtracted from Figure (1).
Which option (A–D) shows the resulting Figure (3)?

Q2.

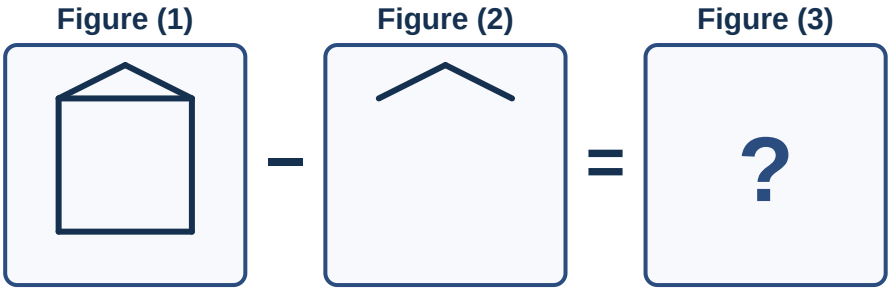

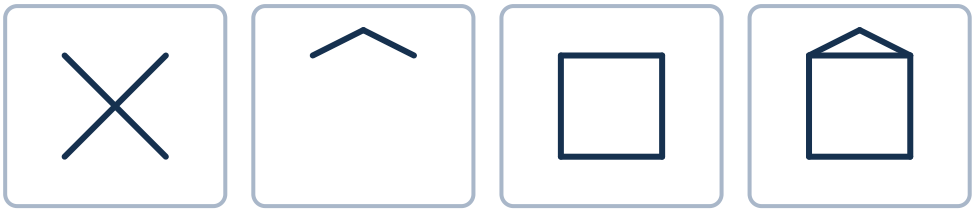

Figure (2) is subtracted from Figure (1).
Which option (A–D) shows the resulting Figure (3)?

Q3.

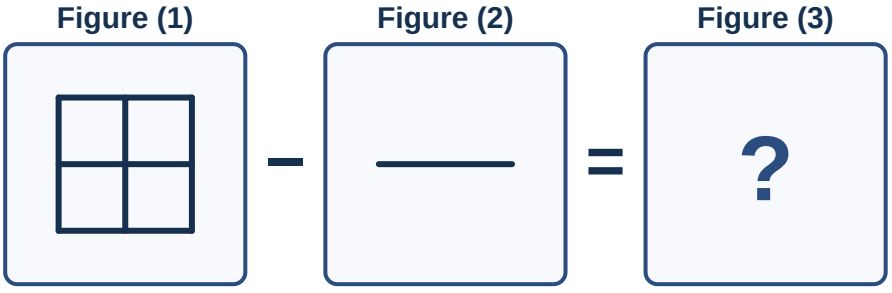

Figure (2) is subtracted from Figure (1).
Which option (A–D) shows the resulting Figure (3)?

Q4.

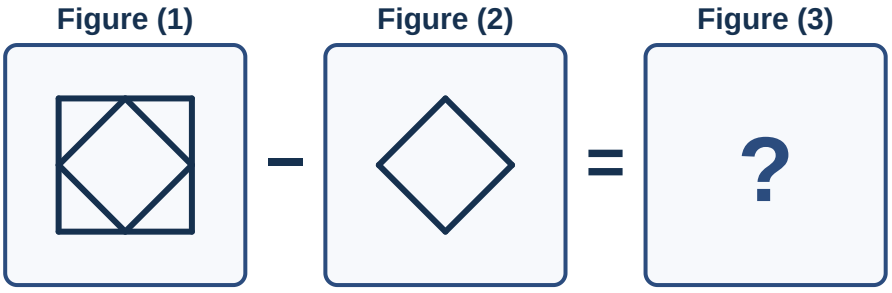

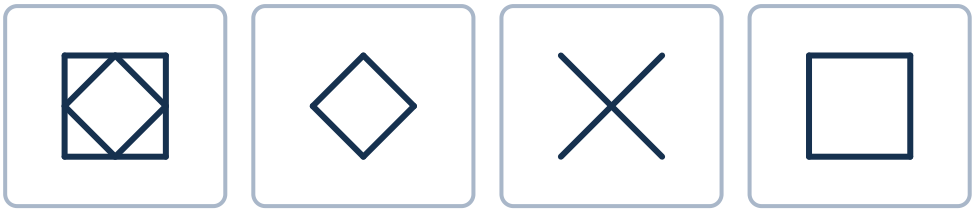

Figure (2) is subtracted from Figure (1).
Which option (A–D) shows the resulting Figure (3)?

Q5.

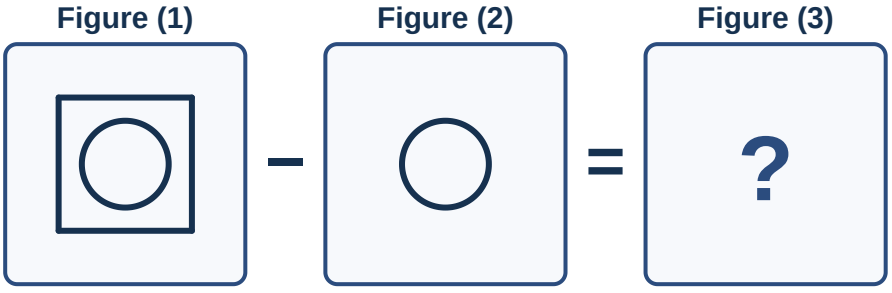

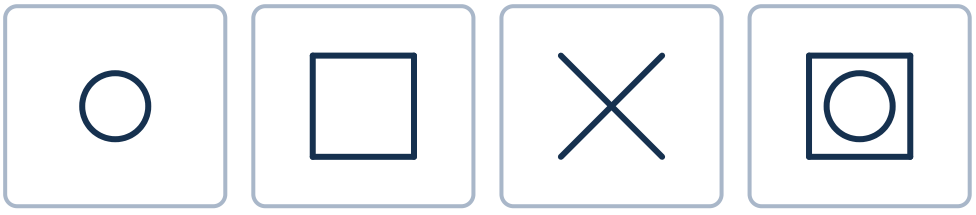

Figure (2) is subtracted from Figure (1).
Which option (A–D) shows the resulting Figure (3)?

Q6.

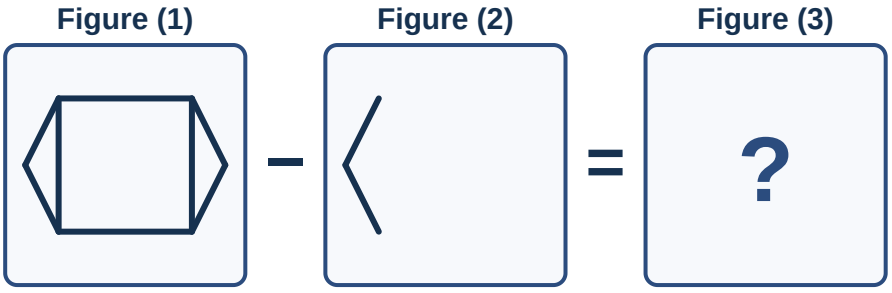

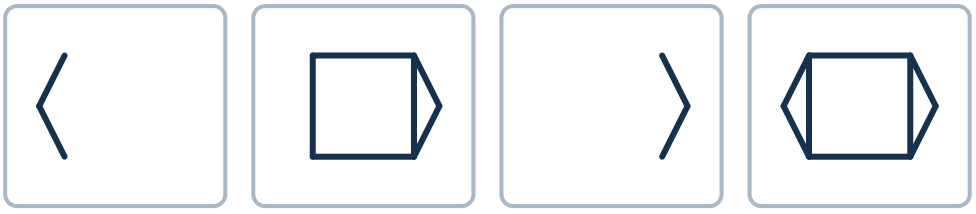

Figure (2) is subtracted from Figure (1).
Which option (A–D) shows the resulting Figure (3)?

Q7.

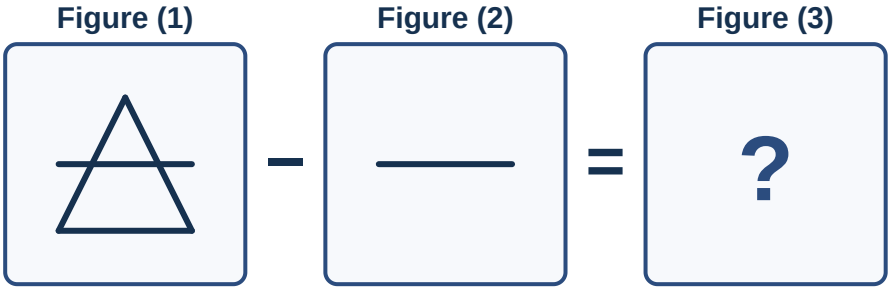

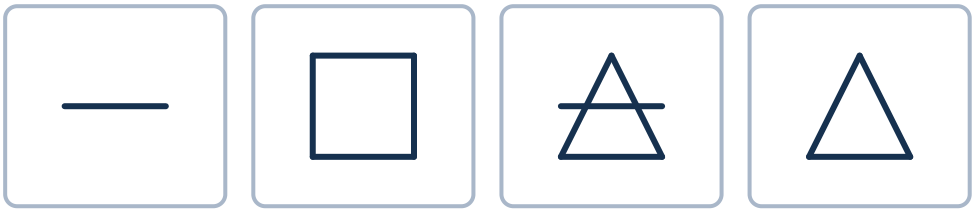

Figure (2) is subtracted from Figure (1).
Which option (A–D) shows the resulting Figure (3)?

Q8.

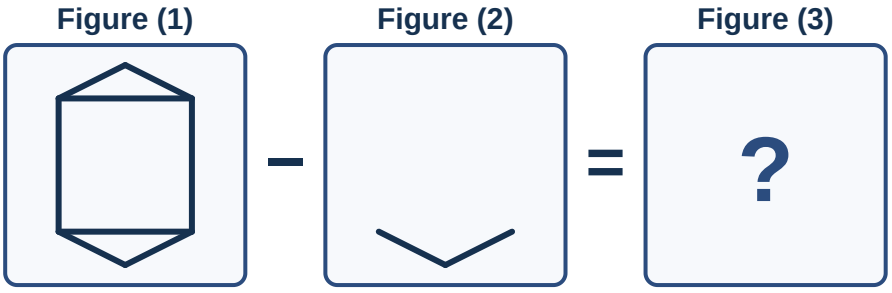

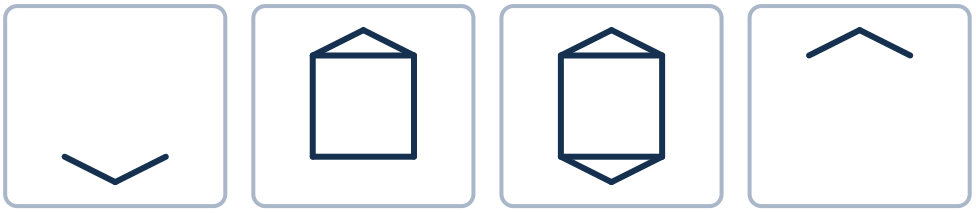

Figure (2) is subtracted from Figure (1).
Which option (A–D) shows the resulting Figure (3)?

Q9.

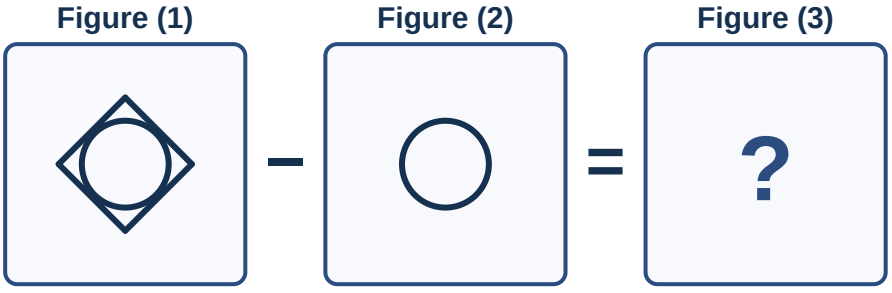

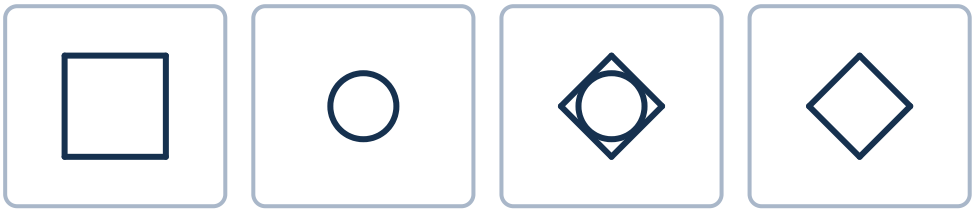

Figure (2) is subtracted from Figure (1).
Which option (A–D) shows the resulting Figure (3)?

Q10.

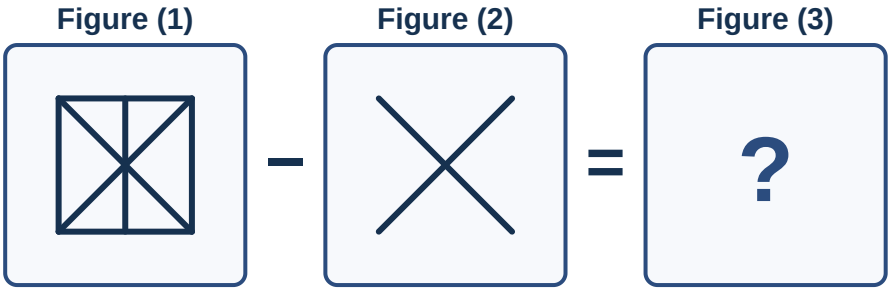

Figure (2) is subtracted from Figure (1).
Which option (A–D) shows the resulting Figure (3)?

Q11.

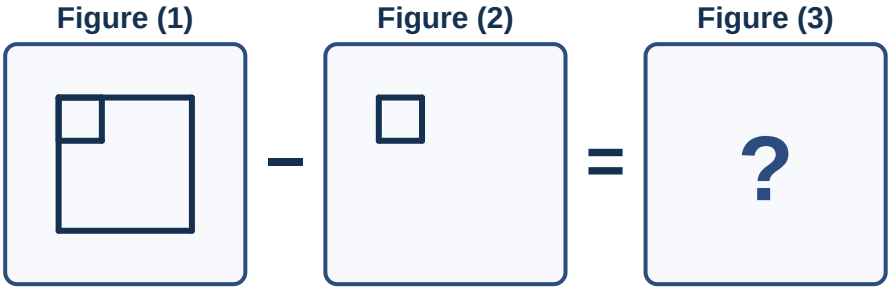

Figure (2) is subtracted from Figure (1).
Which option (A–D) shows the resulting Figure (3)?

Q12.

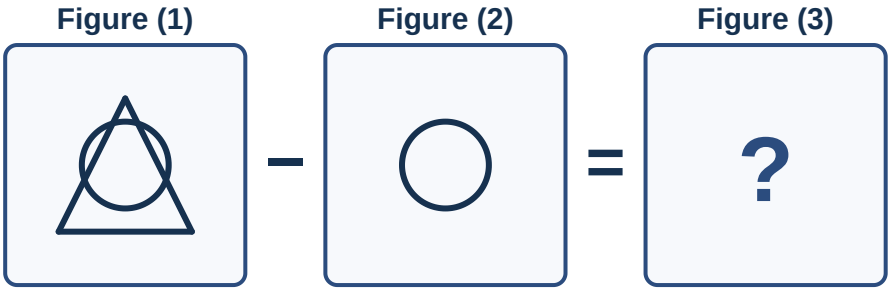

Figure (2) is subtracted from Figure (1).
Which option (A–D) shows the resulting Figure (3)?

Q13.

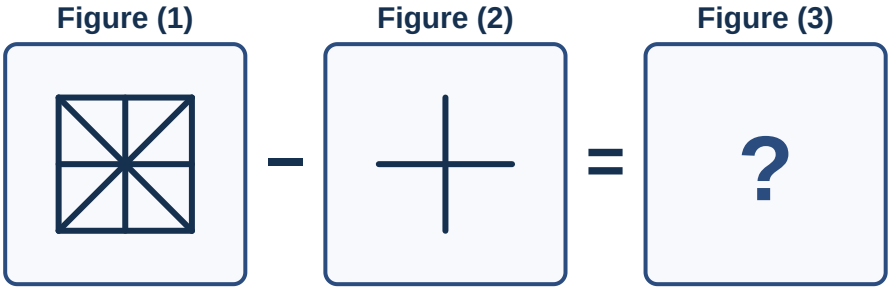

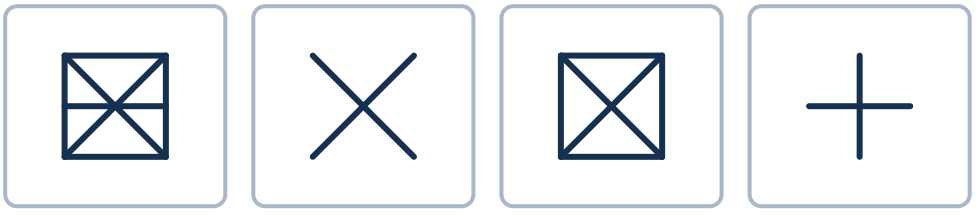

Figure (2) is subtracted from Figure (1).
Which option (A–D) shows the resulting Figure (3)?

Q14.

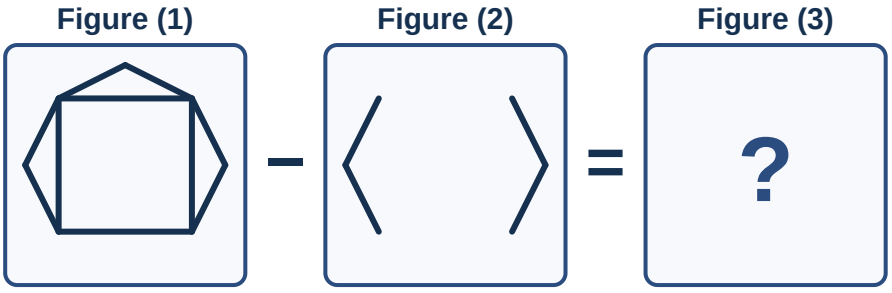

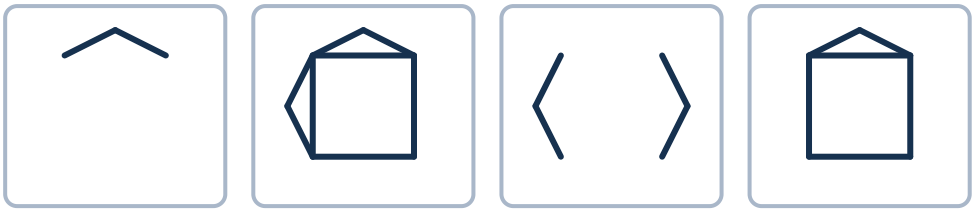

Figure (2) is subtracted from Figure (1).
Which option (A–D) shows the resulting Figure (3)?

Q15.

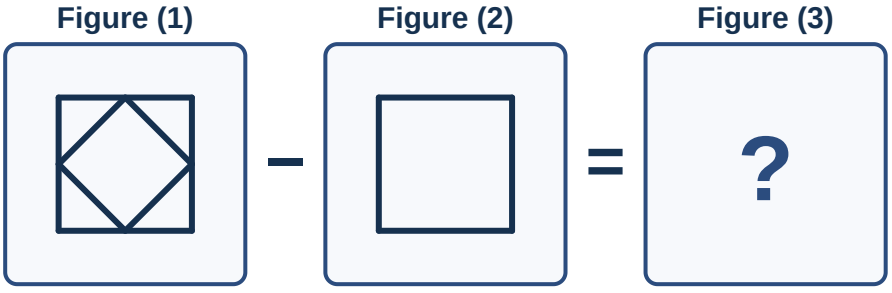

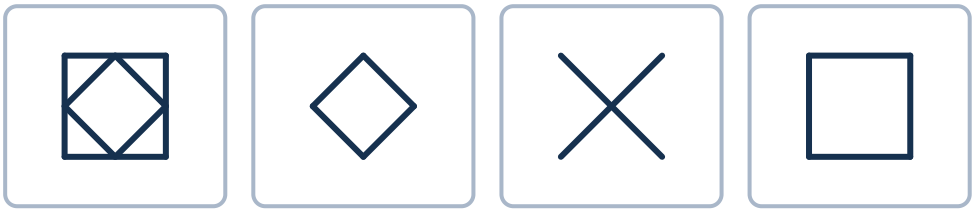

Figure (2) is subtracted from Figure (1).
Which option (A–D) shows the resulting Figure (3)?
