

Assignments

Topic-wise practice worksheets, one folder per week of the plan in `../docs/03-practice-plan.md`. Each folder (once built) contains:

- `assignment.md` — the questions (4-option MCQ, Class 4 difficulty, mixing direct computation with word-problem/Everyday-Maths style framing)
- `answer-key.md` — correct options with a short worked explanation each

Folder list (per the 12-week plan)

Folder	Topic	Status
<code>01-number-sense/</code>	Place value, number names, ordering, rounding, Roman numerals	 Built
<code>02-four-operations/</code>	Addition, subtraction, multiplication, division (multi-digit + word problems)	 Built
<code>03-factors-multiples-patterns/</code>	Factors, multiples, number patterns	 Built
<code>04-fractions-decimals/</code>	Comparing & equivalent fractions, simple decimals	 Built
<code>05-measurement-money/</code>	Length, weight, capacity, money, conversions	 Built
<code>06-time-calendar/</code>	Clock time, duration, calendar	 Built
<code>07-geometry-perimeter-area/</code>	Shapes, symmetry, perimeter, basic area	 Built
<code>08-data-handling/</code>	Tally marks, pictographs, bar graphs	 Built
<code>09-reasoning-patterns-coding/</code>	Number/figure patterns, analogy, classification, alphabet test, coding–decoding	 Built
<code>10-reasoning-direction-figures/</code>	Ranking, direction sense, days & dates	 Built
<code>11-achievers-hots/</code>	Multi-step HOTS problems across all topics above	 Built

All 11 folders are built in the same two-file (`assignment.md` + `answer-key.md`) shape, 15 questions each.

A note on diagram-based question types

Some Section-1 (Logical Reasoning) sub-topics are inherently visual and can't be faithfully represented in plain Markdown text:

- **Mirror images** (which figure is the mirror reflection of a given one)
- **Embedded figures** (spot the hidden shape inside a larger figure)
- **Geometrical shapes and solids** (nets, 3-D solid recognition)

`10-reasoning-direction-figures/` , when built, will cover the *textual* reasoning skills (ranking, direction sense, days & dates) in full, and will call out these three diagram-only sub-topics explicitly so they can be supplemented from an image-based worksheet or workbook rather than silently skipped.
